DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/10/2001 has been entered.

Allowable Subject Matter

2. Claims 10-30 are allowed.

The following is an Examiner's Statement of Reasons for Allowance: Claims are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches a method and apparatus comprising steps of or means for executing a boot program to receive a plurality of packets from a remote computer couple to a communication network and to check the validity of each packet and to store a portion of each packet in a second memory coupled to a controller, and after receiving an upgrade command from the remote computer and after checking the validity, to replace a first operating code, which is stored in a first memory and which controls the apparatus, with a second operating code based on the portion of each packet stored in the second memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Frezza et al (US Patent No. 4,982,430) discloses an apparatus and a method which enable on-line modification and upgrading of terminal software in a communication network while maintaining the integrity of communication between service provider and a subscriber using the network.
